About me

Self-taught web developer, passionate about programming and follower to the functional paradigm. Specialized in creating and improving digital interfaces, with a focus on maintaining complex websites by troubleshooting, implementing new features, and ensuring optimal performance.

I have a deep understanding of the overall front-end web ecosystem, with strong skills in HTML, CSS, and JavaScript, backed by significant experience in frameworks like React. Currently, exploring Golang to expand my skill set.

Beyond the technical realm, my interests extend to philosophy, economics, politics, and history, aiming to shape my own worldview.

Education

2014 - 2017   IPU Presencia de Celia

General Bachelor

Skills

HTML / CSS

JavaScript / TypeScript
